VycePay × Choice Bank

Individual Customer APIs — Not Yet Integrated

Scope: Personal / individual customer only (SME & Merchant excluded) | Generated: 2026-08-09 | Source: choice-bank.gitbook.io

This document lists Choice Bank BaaS APIs that are documented for **individual / personal customers** but are **not yet integrated** in VycePay. Already-integrated wallet KYC, account management, transfers, deposits, utilities, and periodic statements are out of scope.

Reference: https://choice-bank.gitbook.io/choice-bank

Recommended priority for individual customer product

1. **closeSandBoxAccount** + callback **0019** — sandbox testing loop
2. **closeIndividualAccount** — production account closure
3. **walletAccountUpgrade** + callback **0005** — wallet → current
4. **individualOpenAccount** + **0012** — multi-account / multi-currency
5. KYC query helpers + email statement APIs
6. **txReversal** / **pullTransactionIds** — ops resilience

1. Account Lifecycle

API Endpoint	Purpose
`POST /account/closeSandBoxAccount`	Close sandbox test accounts (no OTP; auto-executes; result via callback 0019)
`POST /account/closeIndividualAccount`	Close production wallet/current account (OTP + manual bank review; result via 0019)
`POST /onboarding/walletAccountUpgrade`	Upgrade wallet account to current/bank account (result via callback 0005)
`POST /account/individualOpenAccount`	Open additional personal accounts for an existing customer (multi-currency)
`POST /account/getAccountOpeningStatus`	Poll status of additional personal account opening application
`POST /account/cancelAccountOperation`	Cancel pending OTP-gated ops (activate, add email, verify email) before confirm

2. Current Account Onboarding (Full KYC Path)

VycePay currently uses easy wallet onboarding (`onboarding/v3/submitEasyOnboardingRequest`). The full current-account path below is not wired.

API Endpoint	Purpose
`POST /onboarding/submitOnboardingRequest`	Initiate current-account onboarding with full KYC (KRA, employment, income, industry)
`POST /onboarding/uploadMedia`	Upload KYC media files for the current-account onboarding request

3. KYC Query Helpers

API Endpoint	Purpose
`POST /onboarding/getUserKyc`	Fetch submitted personal KYC details and onboarding status by onboardingRequestId

API Endpoint	Purpose
`POST /onboarding/personal/getKycMediaList`	List uploaded KYC media (URLs / types) for an onboarding request
`POST /onboarding/getOnboardingRequestId`	Resolve onboardingRequestId from userId or mobile

4. Statements (Email Delivery)

URL-based periodic statements (`statement/applyAccountStatement`) are already integrated. Email delivery variants below are not.

API Endpoint	Purpose
`POST /statement/applyBankAccountStatement`	Request bank statement asynchronously; encrypted delivery to owner/manager email
`POST /statement/queryBankAccountStatement`	Query status of email statement job (max 10 requests/day/account; link expires in 7 days)

5. Transfers & Operations (Individual-Relevant)

API Endpoint	Purpose
`POST /trans/txReversal`	Request reversal for a transaction within last 1 month (internal transfers not eligible)
`POST /trans/queryTxReversal`	Fetch reversal request details by applicationId
`POST /query/pullTransactionIds`	Pull transaction IDs for a time window (last 30 days; max 4-hour span) to recover missed inbound txs
`POST /report/queryClosingBalance`	Channel-level closing balance for a date (result via file job / callback 0015)
`POST /trans/baasIntlTx`	Internal transfer between Choice accounts under same BaaS channel without OTP (requires whitelist)

6. Direct Debit / Standing Order (Personal Accounts)

API Endpoint	Purpose
`POST /contract/signPeriodDeductionAgreement`	Authorise recurring debit / standing order on an API-onboarded account
`POST /contract/terminatePeriodDeductionAgreement`	Request termination of an active period-deduction contract
`POST /payment/confirmTerminatePeriodDeduction`	Confirm termination with OTP
`POST /contract/cancelDeductionApplication`	Cancel a standing-order application not yet OTP-confirmed
`POST /contract/queryAccountContract`	List / query standing-order contracts for an account
`POST /contract/updatePeriodDeductionAgreement`	Update amount on an existing period-deduction contract

7. Lookup / Static Data (Current-Account Helpers)

API Endpoint	Purpose
`POST /staticData/getMonthlyIncomeEnumeration`	Monthly income category list for current-account onboarding UI
`POST /staticData/getEmploymentEnumeration`	Employment status category list for current-account onboarding UI

API Endpoint	Purpose
`POST /staticData/getOperationalAccounts`	Choice operational bank accounts for RTGS / EFT / FX deposit & transfer flows
`POST /staticData/getFcyCooperativeBanks`	Banks where Choice holds FX cooperative accounts

8. Callbacks — Individual Handlers Missing

VycePay already handles: **0001**, **0002**, **0003**, **0009**, **0015**, **0021**, **0024**. The following individual-relevant notification types have no dedicated handlers yet:

Type	Meaning
`0005`	Wallet account upgrade result
`0012`	Multiple / additional personal account opening result
`0016`	Interest disbursement notification
`0019`	Account closure result (sandbox or production)
`0020`	OTP delivery callback (licensed / whitelisted partners only)

Out of scope for this document: SME onboarding, SME VAs, joint accounts, merchant bulk transfer, merchant direct debit, fixed deposit, IMT, FX, CNY, and related merchant/SME callbacks (0004, 0006, 0008, 0022, 0023, 0025, 0027, 0028, etc.).
Compare against VycePay integrated surface in `docs/CHOICE_BANK_INTEGRATION.md`.
